

ALOCASIA

Houseplant Care Guide

Pot in well-draining potting soil.

Bright indirect light. Can tolerate direct morning light, but leaves will burn if exposed to extended periods of direct sunlight, especially midday sun exposure.

Always check the moisture of your soil before watering. Water when the top half of the soil is dry. Alocasia do not like to sit wet, so avoid overwatering.

Diluted balanced fertilizer once a month in spring and summer.

Alocasia benefit from high humidity (60-70%).
