

ANTHURIUM

Houseplant Care Guide

Pot in chunky soil mix.

Anthuriums would enjoy a 50/50 mix of orchid and houseplant potting medium.

Place in bright, indirect light for best results. They can tolerate low light conditions but will grow at a slower pace.

Always check the moisture of your soil before watering. Water when the top half of the soil is dry.

Feed once a month in spring and summer with a high nitrogen houseplant fertilizer.

Keep your plant in temperatures about 60 degrees and in high humidity (60-70%).
