

DIEFFENBACHIA

Houseplant Care Guide

Pot in a well-draining potting mix like Black Gold All Purpose Potting Mix.

Place in bright indirect light. Dieffenbachia can tolerate low light condition, but its growth will slow.

Always check the moisture of your soil before watering. Water when the top half of the soil is dry.

Diluted balanced fertilizer once a month in spring and summer.

Dieffenbachia can tolerate average household humidity, but would enjoy a pebble tray or humidifier during the winter months.
