

EUPHORBIA

Houseplant Care Guide

Pot in cactus and succulent mix.

Bright light. Euphorbia would benefit from some direct morning sun. Be cautious about having afternoon sun shining directly on your plant as it can cause burning or yellowing.

Always check the moisture of your soil before watering. Water when the top half of the soil is dry. Be sure to limit watering in the winter when the plant is not actively growing.

Diluted balanced fertilizer once a month in spring and summer.

Euphorbia enjoy environments of at least 50% humidity.
