

BIRD'S NEST FERN

Houseplant Care Guide

Pot in a high-quality potting mix like Black Gold's All Purpose Potting Mix.

Place in bright, indirect light. Bird's nest ferns are tolerant of medium light as well.

Always check the moisture of your soil before watering. Water when the top 2 inches are dry. These ferns do not like to sit wet, so be careful not to overwater. Water the soil and not the fronds to avoid rotting the center of the plant.

Diluted balanced fertilizer at half strength once a month in spring and summer.

Use a pebble tray or humidifier to keep the humidity around your fern at 60 to 70%.
