

FOOTED FERN

Houseplant Care Guide

Pot in a high-quality potting mix like Black Gold's All Purpose Potting Mix.

Place in bright, indirect light. Footed ferns are tolerant of medium light as well.

Always check the moisture of your soil before watering. Water when the top half is dry. Don't let them dry out completely but let them dry out more than a typical houseplant fern.

Diluted balanced fertilizer at half strength once a month in spring and summer. Do not apply to dry soil.

Use a pebble tray or humidifier to keep the humidity around your fern at 60 to 70%.
