Houseplant Care Guide

Pot in a high-quality, well-draining potting mix.

Place in bright, indirect light. They can tolerate low light situations, but their growth will be slower. Do not place your plant in direct sunlight as it will burn the leaves.

Always check the moisture of your soil before watering. Water when the top two inches of soil have dried. They will wilt if they let dry out too much.

Diluted balanced fertilizer at half strength once a month in spring and summer.

Keep them in temperatures between 60-80 degrees. Add humidity with a humidifier or pebble tray.
