

# MARANTA

## Houseplant Care Guide

Pot in a high-quality, well-draining potting mix, like Black Gold All Purpose Potting Mix.

Will perform best in medium to bright, indirect light. It will not do well in direct light.

Always check the moisture of your soil before watering. Water when the top half of the soil has dried. Maranta can be sensitive to hard water. Use rainwater or distilled water if necessary.

Diluted balanced fertilizer at half strength once a month in spring and summer.

Maranta plants appreciate high humidity environments. Use a humidifier or pebble tray to raise the humidity.
