

# MONEY TREE

## Houseplant Care Guide

Pot in well-draining potting soil.

Bright indirect light. Rotate your plant a quarter turn each time you water for even growth.

Always check the moisture of your soil before watering. Water when the soil is 50%-75% dry. Money trees are sensitive to overwatering.

Diluted balanced fertilizer once a month in spring and summer.

Money trees benefit from high humidity 60-70%.
