

MONSTERA

Houseplant Care Guide

Pot in well-draining potting soil.

Monstera can tolerate medium light, but will grow better in bright, indirect light. Monstera can tolerate direct morning light, but will burn in the hot afternoon sun.

Always check the moisture of your soil before watering. Water when the top half of the soil is dry.

Diluted balanced fertilizer once a month in spring and summer.

Monstera enjoys a high humidity environment (60-70%), but will perform in average home humidity.
