

PEACE LILY

Houseplant Care Guide

Pot in a high-quality, well-draining soil.

Place in bright indirect light. It can tolerate medium light situations but it will slow the plants growth.

Always check the moisture of your soil before watering. Water when the top inch of soil has dried. Peace Lily prefer bottom watering. This helps to prevent overwatering

Diluted balanced fertilizer once a month in spring and summer.

Peace lily prefer humid environments (60-70%). Add a pebble tray or humidifier to increase the humidity around your plant.
